

Production Employee – Evening/Night Shift

Are you ready to take responsibility and work with production in a versatile role within an inspiring and dynamic work environment? Then we have an exciting opportunity for you to become part of a dedicated team developing energy-efficient products.

We develop products that help our customers increase efficiency and reduce environmental impact. Our headquarters are located in Sønderborg, and our production takes place both in Europe and Asia. At our facilities in Sønderborg, we handle smaller production series, assembly, and quality testing of our products.

The position is for the **evening/night shift**.

Your primary tasks

- Carry out production according to documentation and/or models
Primarily assembly of inverter units and secondarily other products for the heating and ventilation industry.
- Functional testing.
- Quality control.

Additional tasks

- Assist with software programming of products.
- Help with packing spare parts.

We imagine that you

- Have experience with electronic assembly and testing.
- Have experience with soldering.
- Work systematically and in a structured manner with attention to detail.
- Are able to work independently and with a strong focus on quality.

It is important that you are comfortable with physical work, as some tasks require good physical condition and a large part of the work is performed standing or walking.

We offer

We offer an exciting position where you will become part of a strong production team in a company with an inspiring and positive working environment. You will have the opportunity to develop both professionally and personally.

If you have any questions about the position, please contact Head of Production and Warehouse, Claus Jensen, at +45 73 42 37 65.

Applications will be reviewed on an ongoing basis.

—

BITZER Electronics develops and produces electronic control solutions for the global HVAC&R market. Our products are used by manufacturers of refrigeration, heating, and ventilation systems where high standards for reliability, functionality, and energy efficiency are essential.

We are a technology-driven company with more than 125 dedicated employees and combine development, production, and testing at our facilities in Sønderborg, Denmark. Our daily work is characterized by a strong professional environment, close collaboration across functions, and a strong focus on quality in both products and processes.

BITZER Electronics is part of the BITZER Group—a global manufacturer of refrigeration compressors with more than 4,500 employees worldwide.

Our internal surveys show high employee satisfaction and strong engagement among our employees—something we are proud of and continuously work to maintain.
